

CELLPHONE DETECTOR **POCKETHOUND**

POCKET-SIZED AND COVERT

- **CHEATING STUDENTS**
- **CORPORATE ESPIONAGE**
- **COURTROOM PERSONNEL**

PocketHound is Bundpol's highly sensitive yet most easily concealed cell phone detector on the market. The receiver is specifically tuned to the RF signature of common cell phones (both U.S. & European bands) including PCS, CDMA / WCDMA (UMTS), GSM, EGSM Cellular bands. This breadth of band detection allows security personnel to locate any nearby cell phones in either standby mode or during active voice, text or data RF transmissions making it the perfect tool for enforcing your **NO WIRELESS** security policy. Pocket Hound prevents wireless usage by detecting nearby cell phone use all from the user's pocket or in the palm of their hand. PocketHound's auto threshold feature only detects cell phone activity above the RF noise in any environment. This prevents false triggers and alerts the user to any cell phone activity with custom sequences of bright LED flashing and also provides vibration for completely covert, in-pocket detection.

CELLPHONE DETECTOR POCKET HOUND

POCKET-SIZED AND COVERT

Bands:

(EGSM 900) 880 - 915 MHz
(GSM 1800) 1710,2 - 1784,8 MHz
(WCDMA / UMTS) 1920 - 1980 MHz

Technical Data:

Radius of Coverage Range:	+ - 25 meters under typical conditions (indoor line-of-sight)
Dynamic Range:	60 dB
Sensitivity:	- 80 dB (user selectable)
Detector Resolution:	2 dB
Bandwidth Resolution:	4 MHz
Selectivity Rejection:	> 50 dB @ 1 MHz from uplink band edges
Receiving Modes:	High Speed Scanning (uplink cellphone bands)
Antennas supported:	Internal direktional flat panel antenna
Includes:	USB cable, mini USB 5VDC charger, PC configuration software
